

INTELLIGENT 12 & 24V BATTERY CHARGER

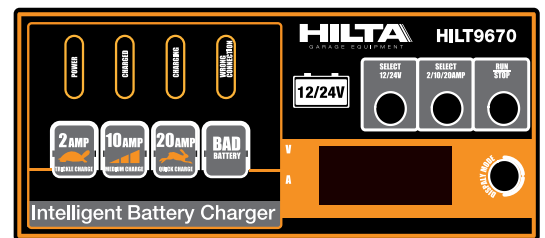

Part No. HILT9670

HILTA
GARAGE EQUIPMENT

The **HILTA** Intelligent battery charger is controlled by microprocessor which guarantees maximum effectiveness and security.

- ✓ The charge is **automatic, intelligent and microprocessor controlled**, so can be operated without supervision.
- ✓ **50% shorter charge** time compared to a traditional charger. The HILTA intelligent charger ensures an ultra-quick and safe charge.
- ✓ The HILTA intelligent charger is a 7-step **microprocessor controlled smart charger** that constantly analyses the state of the battery and regulates the charge according to the battery's needs. It also maintains the battery after fully charging.
- ✓ **Deeply discharged batteries** that are still in a good state of health (eg: Lights on when the vehicle is stopped) could have a voltage as low as 1V. These can be revived using the HILTA intelligent charger.
- ✓ **Protection of the on-board electronics.** No need to disconnect the battery from the vehicle. No risk of sparks or short-circuits, and no current is supplied to the clamps unless they are connected to the battery terminals.
